**THE  
ACRYLISTAIN  
SYSTEM**

**THE RICH LOOK OF  
CONCRETE  
STAINING WITH  
ENVIRONMENTALLY  
FRIENDLY  
PRODUCTS..**

**The Looks You Love  
From Products You Can  
Trust.**

CTi's Acrylistain System provides your home with the rich, warm look of concrete stain while giving your floors a tough as nails protective coating that will withstand heavy traffic, and stains, and keep its luster for years.

The Acrylistain System comes in a number of colors and styles to give you a look that is all your own. Unlike acid stained concrete, CTi's Acrylistain System uses only environmentally friendly products that will not damage cabinets, rails and other surrounding areas where a unique look is needed. In addition, CTi's Acrylistain provides a consistent, color integrated look that is not affected by the chemical make-up of the existing concrete.

**CTi's Acrylistain System is perfect for:**

- **Kitchens**
- **Playrooms**
- **Basements**
- **Bathrooms**
- **Driveways**
- **Patios**
- **Pool Decks**
- **Foyers**

In addition to its beauty, the Acrylistain System is easier to maintain than tile, wood or other industry standard products. The Acrylistain System can be applied over concrete that has cracks, chips or other defects due to its ability to cover those imperfections and give your floor a brand new look.

Call your local CTi Dealer today to find out more about how we can improve the looks of your home.
